

MFT EZ GLUE

Heavy Bodied Vinyl Fence Adhesive

Technical Specifications

Composition	High-activity chemical vinyl solvent weld base
Color	Opaque White
Additives	Advanced UV Inhibitors
Coverage Rate	~80 fence post caps per 1 fluid ounce
Application Temperature	High-Reactive Formulation optimized for all-weather outdoor use
Country of Origin	100% Made in the USA
Regulatory Compliance	MSDS safety sheets included in every case

1 oz. Tube: Binds up to 80 post caps Perfect for residential fence projects and eliminate job site mess.

3oz. Tube: Binds up to 240 post caps. Sized for commercial field crews and professional fence contractors.

1Gallon Rectangular Tin Can: Intended for automated shop Environments, manufacturing facilities, or heavy bulk fabrication.

Features & Benefits

- ✓ **Enhanced Fusion Power**
- ✓ **Outdoor Weatherization**
- ✓ **Extended Shelf Life**
- ✓ **High-Yield Economy**

Formulated 20% hotter to bite deeper into vinyl, creating an unbreakable, permanent chemical weld. Integrated UV protectants and specialized white fillers prevent yellowing, cracking, or degrading from sun exposure. High-reactivity chemistry preserves solvent fluidity longer inside sealed packaging, minimizing dried-out product loss. Superior chemical bite means a minimal dab provides total structural adhesion, radically reducing volume used per job.
